

I wanted to let the FCC know that I believe national/regional broadcasters using local translators do have a positive effect and play an important role in local communities. One example of this is K-LOVE, a station that brings positive and uplifting commercial free music into our community. If K-LOVE were displaced in our community by a smaller LPFM station, we would lose this programming which is meaningful to many members of our community. I donate money to K-LOVE monthly in support of the programming they provide, and I believe that much of this unique programming could only be provided by a national/regional broadcaster like K-LOVE. Thank you for your time.
